[+1 \(470\) BEN C LEG \(236-2534\)](tel:+1470BENCLEG2362534)

Employment

RR Donnelley — Motif

(Contract from July 2019 – October 2019)

macOS Software Architect

Defined the future **architecture** for the leading photo book software on **macOS**. Instituted **standard practices** across teams to bring development in-house and improve turnaround.

Worked back-and-forth with UI/UX leads to ensure a **smooth and intuitive** transition between operating system versions.

Ionic Security (2017 – 2019)

macOS Software Engineer

Engineered **user-facing** file **encryption** and access software for macOS. Collaborated on a company-wide **software platform** to allow such client software to be made consistent on many other platforms, including **macOS, Android, Windows, and iOS**.

Worked closely with UI/UX team to hone the design of multiple company products, including **graphics, animations, user flows**, and overall **experience**.

Renewed Vision (2016 – 2017)

macOS Software Engineer

Built industry-leading **professional presentation** software for **macOS**. Collaboratively created **software platforms** with **open-source & proprietary** tech: advanced **auto font scaling, inspector**, & animated grid item selector.

Designed dozens of **icons** & other graphics, **user flows**, interface approaches, **animations**, and more.

NCR — Small & Medium Business

(2016 – 2017)

Mobile Software Engineer

Built state-of-the-art **point-of-sale** software for **iOS & Android**. Implemented headlining features such as **64-bit** support, **EMV** payments, **scale-weighting** of items, & **future orders**, including any hardware drivers necessary for these.

Worked alongside UI design team to revamp the system's **look-and-feel**.

University System of Georgia
Information Technology Services

(2012 – 2014)

Web Developer & Designer

Redesigned & rebuilt **ColumbusState.edu** and dozens of sub-sites in **HTML5+CSS3**, with XSLT & PHP where needed. Made templates for CMS so teachers could build pages.

Invented, critiqued, and evolved design elements for CSU website. Designed pages for all schools of the University within a consistent theme.
